Chennai, India

Project Description	The Party Organizer System is an innovative web-based application designed to revolutionize the event planning experience, catering to a diverse range of celebrations, from birthdays to weddings and corporate events. This comprehensive platform acts as a central hub for party organizers to showcase their services and for clients to seamlessly browse, book, and manage event services. With a focus on user-friendly interactions and efficient event management, this system aims to enhance the overall experience for both organizers and clients in the dynamic world of event planning.
Role & Contribution	<p>Role:</p> <p>~ Team Leader</p> <p>Created a secure login process for user authentication.</p> <p>Verified user credentials securely for system access.</p> <p>Assigned specific responsibilities to team members based on their skills.</p> <p>Monitored progress and offered support when needed.</p> <p>Achievements:</p> <p>Achieved a score of 79% out of 100% in Capstone Project Evaluation.</p>
Skills	Java, Java Spring Boot, Angular

## In-house Training

- I have undergone Training on Java Full Stack.
- I learned Core Java, Spring Boot and Angular.
- The training is based on Experimental Learning, which include one session for Teaching Theory and Other session for Hands on Practise.
- At end of training, I had done a real-time project by using the skills I have learned in the training.
- Duration of Training is 3 months.

## Certification

1Z0-808 -Oracle Certified Associate-Java SE 8 Programmer-1.
